c. Area of Professionalization

Modules which are part of professional skills have to be completed successfully worth a total of 12 C.

d. Foreign Students with limited German Language Skills

Differing from letter c), foreign students who select a module package exclusively taught in English as part of their degree programme “East Asian Studies/Modern Sinology” and who do not meet at least the German language level DSH-1 have to successfully complete modules of a total of at least 12 C which are part of the module handbook of the exam regulations for the German Language Examination for University Entrance (DSH).

e. Master's Thesis

Students earn 30 C by successfully completing their master's thesis.

2. Joint Honours in Modern Sinology for a total of 42 C

a. Compulsory Modules

The following three compulsory modules of a total of 24 C have to be completed successfully:

M.OAW.MS.015: State of the Art: Chinese Technical and Primary Source Materials (6 C, 2 SWS).....	6372
M.OAW.MS.016: Case Studies: Chinese Technical and Primary Source Materials (6 C, 2 SWS).....	6373
M.OAW.MS.019: Colloquium (12 C, 2 SWS).....	6375

b. Elective Compulsory Modules

Modules of a total of 18 C have to be completed successfully according to the following regulations:

aa. Elective Compulsory Modules A

One of the following modules worth a total of at least 9 C has to be completed successfully:

M.OAW.MS.001: State of the Art: History of Modern China (9 C, 2 SWS).....	6358
M.OAW.MS.002: State of the Art: Philosophy of Modern China (9 C, 2 SWS).....	6359

Module B.WIWI-OPH.0008: Macroeconomics I		4 WLH
<p>Learning outcome, core skills:</p> <p>In particular, this course provides an overview of the recording and evaluation of economic processes at a macroeconomic level of aggregation. The economic importance of money will be discussed and the achievement of macroeconomic equilibrium as well as the effects of economic policy measures on the basis of various model structures will be analyzed. The assumptions behind these models will be critically questioned on the basis of empirical data. Ultimately, approaches to recording data and the role of international economic relations will be addressed.</p> <p>Students</p> <ul style="list-style-type: none"> • understand the economic process as a cycle and can demonstrate the relationships between the individual sectors. • are able to describe and delineate the gross domestic product in various ways and to critically reflect on its importance as a measure of the welfare of a country. • are familiar with the functions and the economic importance of money as well as with the measurement and effects of inflation. • are familiar with different economic schools of thought and can classify macroeconomic models based on these. • are able to analyze the effects of economic policy measures on the basis of various models and to reflect critically on the resulting differences in effect. • can systematically comprehend the foreign economic relations of an economy and assess the economic significance of the resulting imbalances. <p>During the accompanying tutorial, students broaden knowledge acquired in the lecture with the help of selected theoretical issues.</p>		<p>Workload:</p> <p>Attendance time: 56 h</p> <p>Self-study time: 124 h</p>

<p>Georg-August-Universität Göttingen Module B.WIWI-VWL.0002: Macroeconomics II</p>	<p>6 C 4 WLH</p>
<p>Learning outcome, core skills: The lecture delves deeper into and expands on the material covered in the module Macroeconomics I. One focus is the discussion of the relationships in labor market theory that are taken into account in well-known macroeconomic models to distinguish between short- and long-term effects of economic measures. Other emphases include the analysis of economic growth and microeconomic foundations of macroeconomic assumptions. Finally, students will analyze economic policies in open economies in the classical and Keynesian context and discuss their effects in different monetary systems. Statements about the suitability of various monetary systems will then be derived from these considerations, during which the European Monetary Union will also be discussed.</p> <p>Students will</p> <ul style="list-style-type: none"> • understand the relationships in labor markets, know the determinants of labor supply and demand and be able to demonstrate labor market equilibrium. • be able to expand known macroeconomic models with theoretical labor market knowledge and thereby distinguish between long- and short-term effects of economic policy measures. • be able to demonstrate the relationship between inflation and unemployment on the basis of the Phillips curve and critically reflect on this. • be familiar with different growth models and know the importance of growth for an economy. • be able to expand a macroeconomic model based on its foreign relations and discuss the effects of different economic policies on the basis of this model. • know the characteristics of different monetary systems and be able to evaluate their advantages and disadvantages while taking into account their impact on the effects of economic policy measures. <p>During the accompanying tutorial, students broaden knowledge acquired in the lecture with the help of selected theoretical issues.</p>	<p>Workload: Attendance time: 56 h Self-study time: 124 h</p>

Module M.OAW.MS.001: State of the Art: History of Modern China		
Learning outcome, core skills: The module covers the current state of the art regarding modern Chinese history. The students are introduced to key questions of the discipline by reading recent research publications. They discuss and compare Western and Chinese state of the art, among others focusing on theoretical assumptions and their relevance to core questions of the discipline. They pay particular attention to the question whether and how scientific theories developed when studying Western phenomena can be transposed to Non-Western areas of research. Additionally, general theoretical texts relevant to the issue of the transposition of Western theories are given to the students in order to develop further questions and reflections on the concrete topics of the course. The students enlarge on one specific topic by a) preparing a presentation and b) writing a term paper.		Workload: Attendance time: 28 h Self-study time: 242 h

Module M.OAW.MS.004: State of the Art: Politics of Modern China		
Learning outcome, core skills: The module covers the current state of the art regarding modern Chinese politics. The students are introduced to key questions of the discipline by reading recent research publications. They discuss and compare Western and Chinese state of the art, among others focusing on theoretical assumptions and their relevance to core questions of the discipline. They pay particular attention to the question whether and how scientific theories developed when studying Western phenomena can be transposed to Non-Western areas of research. Additionally, general theoretical texts relevant to the issue of the transposition of Western theories are given to the students in order to develop further questions and reflections on the concrete topics of the course. Module M.OAW.MS.015: State of the Art: Chinese Technical and Primary Source Materials		
Learning outcome, core skills: The students are trained in reading texts in specialized language such as scientific texts on politics, history, society etc. Selected Chinese texts are read, terminologically analyzed, historically contextualized and partially translated.	Workload: Attendance time: 28 h Self-study time: 152 h	
Course: Exercise course (Exercise)	2 WLH	
Examination: Term Paper (max. 5 pages) Examination prerequisites: regular and active participation, written translations of course readings (1 text per session, max. 3 pages A4) Examination requirements: Written scientific translation of a specialized Chinese text with ca. 3.000 characters (ca. 5 pages A4) into English.	6 C	
Examination requirements: Students know how to understand and analyze the language, the terminology and the content of texts in specialized language and how to adequately translate these texts into specialized English. This includes the ability to relate the texts to the state of the art and to contextualize them historically and politically.

Georg-August-Universität Göttingen Module M.OAW.MS.019: Colloquium	12 C 2 WLH
Learning outcome, core skills: In this module students are trained in developing their own research projects particularly with regard to research approach, research question and methodological and theoretical concepts to be used for their project. They get the opportunity to present their research project underlying their MA thesis and can thereby profit from the respective discussions and comments, helping them with their further research. All students have to read relevant academic literature on the topics of the different presentations and research projects as well as on the relevant theoretical approaches.	Workload: Attendance time: 28 h Self-study time: 332 h
Course: Master colloquium (Seminar)	2 WLH
Examination: Oral Presentation (approx. 30 minutes), not graded Examination prerequisites: regular participation, written exposé (max. 5000 words) Examination requirements: Students have draft an exposé of the planned MA thesis together with their supervisor and present topic, research approach and progress of their research to their fellow students as well as respond to critical questions.	12 C
Examination requirements: Students have draft an exposé of the planned MA thesis together with their supervisor and present topic, research approach and progress of their research to their fellow students as well as respond to critical questions.	
Admission requirements: Successful completion of at least one of the following modules: M.OAW.MS.001 to M.OAW.MS.014 (see remark)	Recommended previous knowledge: None

Additional notes and regulations: Students studying Modern Sinology totaling 78 C have to have completed at least two of the modules mentioned. Students studying Modern Sinology totaling 42 C have to have completed at least one of the modules mentioned.	

Georg-August-Universität Göttingen Module M.OAW.MS.020: Modern Chinese VI	6 C 8 WLH
Learning outcome, core skills: After completing this module, students can follow and understand Chinese-language lectures, including technical discussions in their field of specialization, and participate in discussions conducted in standard Chinese relating to issues such as work and current events. They can understand newscasts and current affairs programs (TV, radio), as well as feature films, provided they are in the standard language. Students have sufficient language skills to express themselves clearly on general topics and share their personal views. They need not spend too much time searching for the right word, use complex sentence structures and show a fairly good command of grammar. They no longer make mistakes that lead to misunderstandings.	Workload: Attendance time: 112 h Self-study time: 68 h
Courses: 1. Speaking and Listening (Exercise) 2. Reading and Writing (Exercise)	4 WLH 4 WLH
Examination: Language proficiency test: written part (text editing, grammar, vocabulary and translation 120 min.) and oral part (speaking and listening; approx. 20 min.) Examination requirements:	6 C
Examination requirements: The students have to prove their language skills in listening, speaking, reading and writing in intercultural contexts of oral and written communication (receptive skills on level B2.2 of the Common European Framework of Reference for Languages).	
Admission requirements: B.A. degree with a level of language skills equivalent to the level achieved in the B.A. "Moderne Sinologie" or "Chinesisch als Fremdsprache" of the University of Göttingen	Recommended previous knowledge: none
Language: Chinesisch, German	Person responsible for module: Lingling Ni
Course frequency: each winter semester	Duration: 2 semester[s]
Number of repeat examinations permitted: twice	Recommended semester:
Maximum number of students: 24	
Additional notes and regulations:	

The teaching language in this module is Chinese as the module is aimed at advancing and improving language skills. Translations will be done from Chinese into English by students of the study program “MA Modern Sinology” and into German by students of the study program “Master of Education Chinesisch als Fremdsprache”.
